Fiscalization Essentials

France, officially the French Republic, is a unitary semi-presidential republic. The country's largest city and main cultural and commercial center is Paris.

Fiscalization was introduced in this country in 2018. France implements a software-based fiscal approach. The main requirement is to use certified POS solution that will ensure that all transactions are recorded and stored in the way that manipulations are not possible.

Certification of POS application before usage is mandatory. The certification process is carried out by the bodies accredited by the French Committee of Accreditation:

- ✓ INFOCERT (AFNOR), and
- ✓ LNE - The National Laboratory of Metrology and Testing.

Self-certification, which is allowed only for POS software manufacturers, is also possible, but not recommendable.

In regard to multi-function software (accounting / management / cash), only the cash register / collection functions (not the entire software), must be certified.

There is no certification of hardware devices or mandatory hardware devices that have to be used.

Concept is technologically open and not limited by the proprietary solution of any manufacturer.
